

# Windows SubSystem for Linux

Get a Linux environment on your windows computer if you must.

1. Open PowerShell as Administrator

```
Enable-WindowsOptionalFeature -Online -FeatureName Microsoft-Windows-Subsystem-Linux
```

2. Reboot

3. Choose and download an OS. Samples provided below.

Download Ubuntu 20.04

```
Invoke-WebRequest -Uri https://aka.ms/wslubuntu2004 -OutFile Ubuntu.appx -UseBasicParsing
```

4. Install.

```
Add-AppxPackage .\Ubuntu.appx
```
