

Swift Kickstart

Swift is in preview mode and should not be used for anything important. The current cluster will be destroyed and data may be removed without notice ¹⁾. Additionally, you will need to have a conversation with TechStaff to setup a project scope before you can follow these instructions.

Obtain Application Credentials

1 Login to Web Application

First, accept the certificate and login to [The Dashboard](#) with your CNetID and password. Write `csldap` in the domain field of the login page.

2 Create Application Credentials

Using the menu on the left, select "Identity → Application Credentials" to access [Application Credentials](#) interface. Click the "+ Create Application Credential" button and fill out the form.

Be sure to download the application credentials after submitting the form

¹⁾
