

Swift Kickstart with Rclone (demo)

Swift is in preview mode and should not be used for anything important. The current cluster will be destroyed and data may be removed without notice ¹⁾. Additionally, you will need to have a conversation with TechStaff to setup a project scope before you can follow these instructions.

Obtain Application Credentials

1 Login to Web Application

First, accept the certificate and login to [The Dashboard](#) with your CNetID and password. Write `csldap` in the domain field of the login page.

2 Create Application Credentials

Using the menu on the left, select "Identity → Application Credentials" to access [Application Credentials](#) interface. Click the "+ Create Application Credential" button and fill out the form.

Be sure to download the application credentials after submitting the form

¹⁾
