

Crerar Networking

Networks

CS Networks are comprised of the following subnets:

Public	128.135.11.0/24
Public	128.135.123.128/25
Private	10.135.11.0/24
Private	10.135.18.0/24

Network Jacks

- There can be only one subnet per network jack.
- The first network jack is patched into the switches.
- As of 20180826 we have tried to assign the jack to the correct subnet.

Requesting Wired Network Access

Wired network access is provided for all techstaff-managed systems. If you have a personally-managed system and would like wired access, please send us a request with details. We can then provision an IP address for your use and/or request that a port be activated for your use. When making your request, please note if you'll need off-campus access to any services running on your system. To start the request process, just e-mail techstaff@cs.uchicago.edu.
