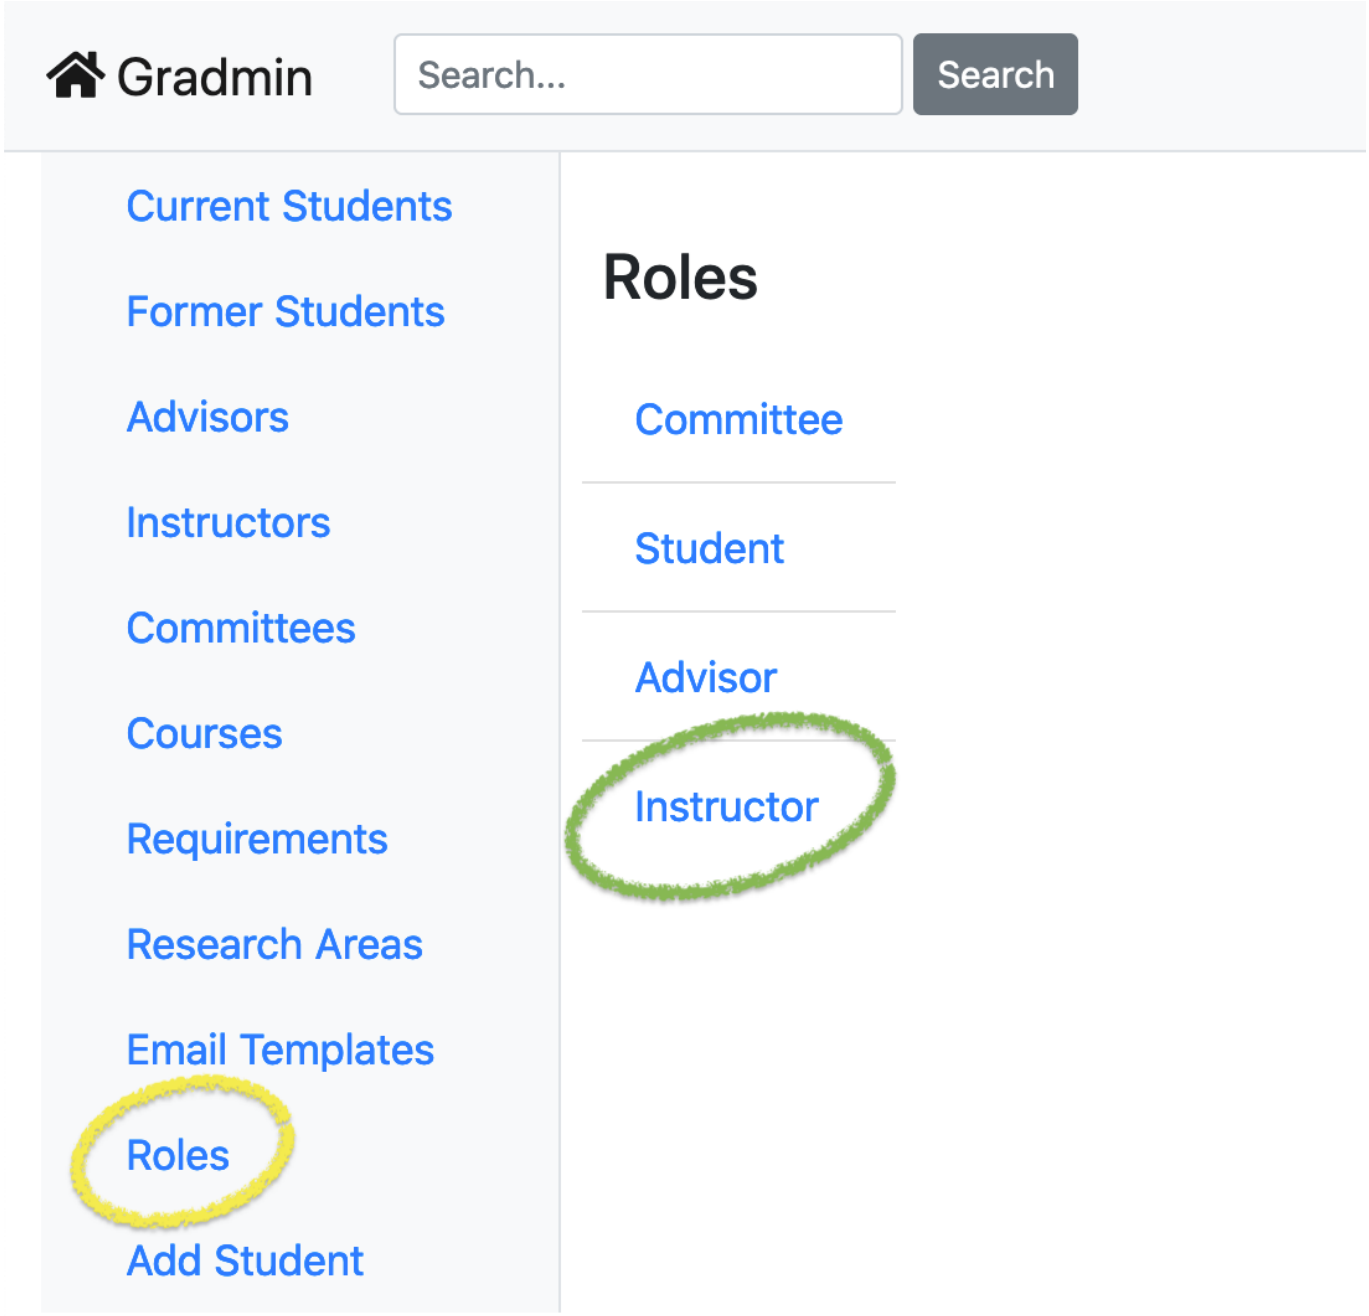
Roles Administration

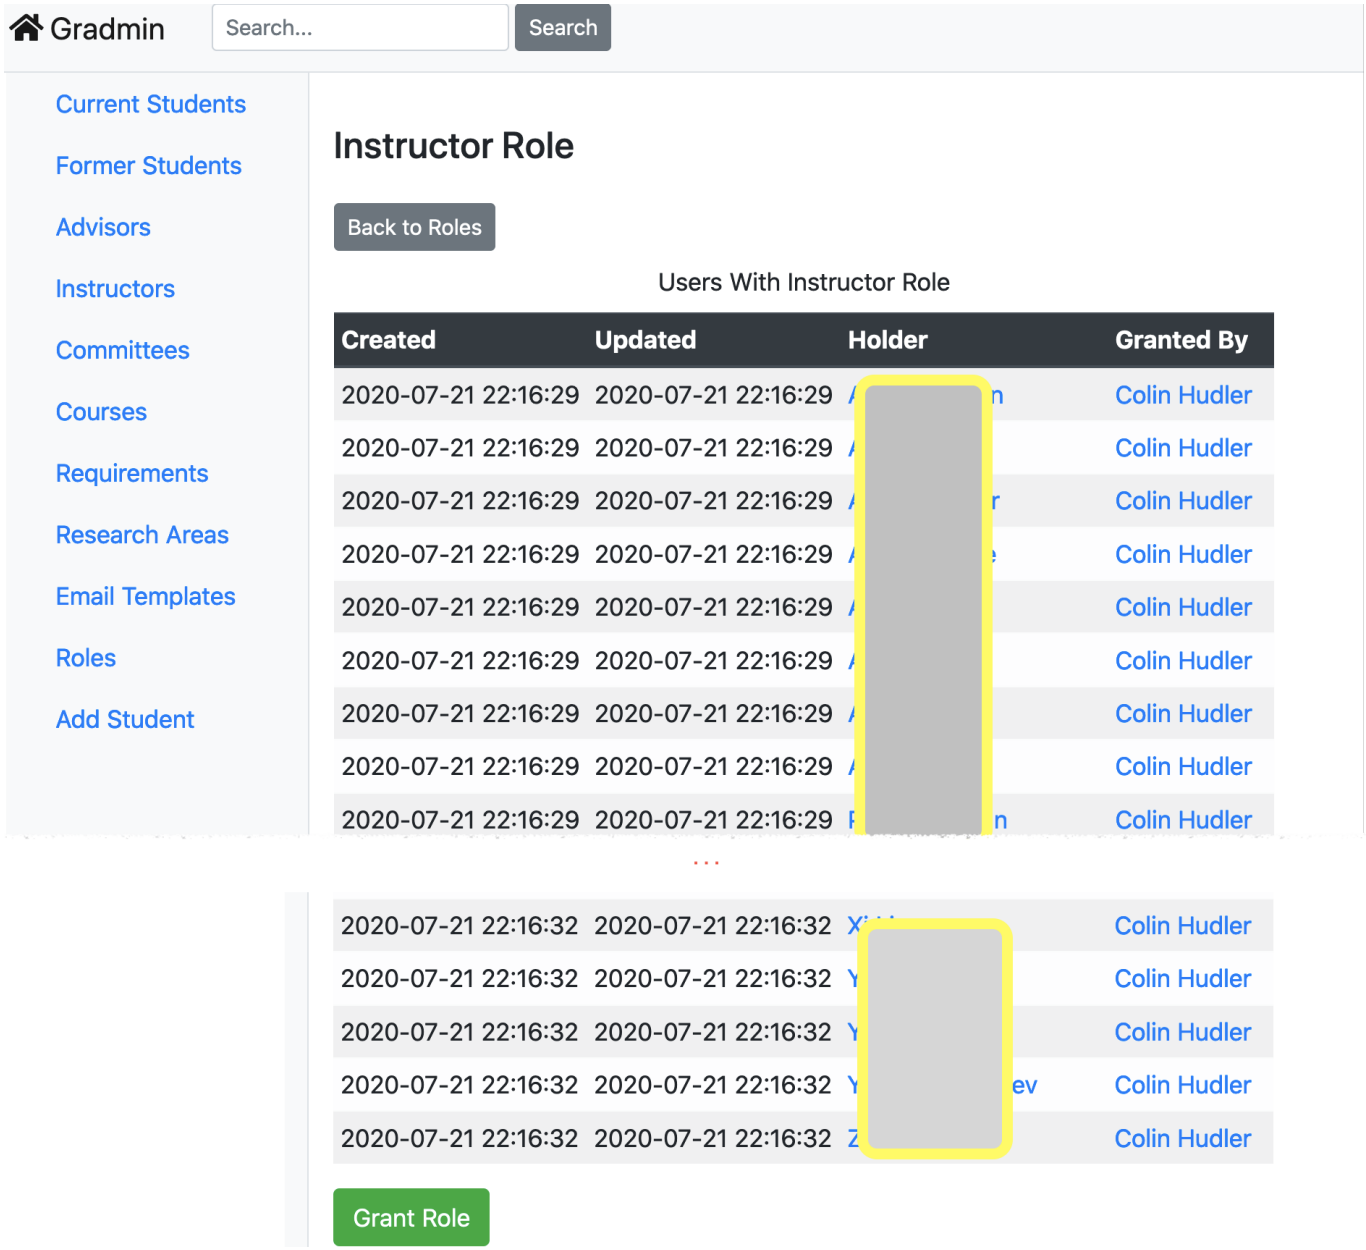
The following discussion **is relevant only to `Admin`** roles. For more general information about roles, see The Roles Article

Listing Roles and Holders

There are several viewpoints into the two types of Roles that the system supports. For the highest possible overview of Roles and holders, click the Roles link on the left side menu that is on every screen. The example below shows the Roles link highlighted and the `Instructor` Role details link.



The following image shows an example of the `Instructor` Role. The page shows a table with all users currently having the role. Click the user's name for more information about the person.



Modifying Roles
