

# Quota

## Check your quota

To check your quota use the command 'csquota' which is just a wrapper script around 'quota' (because bugs). You should see something like this:

```

user@computer:~$ csquota
Filesystem                space  quota  limit  grace
server.cs.uchicago.edu:/export/homes/user  918M  2000M  2500M  15296

```

<b>space</b>	denotes how much space you are currently using.
<b>quota</b>	The maximum amount of disk usage a quota user has.
<b>limit</b>	Hard limit works only when grace period is set. It specifies the absolute limit on the disk usage, which a quota user can't go beyond his hard limit.
<b>grace</b>	The time limit before the soft limit is enforced.
