

# Time Machine

A time machine server to be used for backups. The backend storage is storage is quite slow, but uses ZFS to ensure data integrity.

## Who has access

Faculty and staff. For now you must request access.

## How to use

### Step 1

Mount the network volume that you will be backing up to.

### Step 2

### Step 3

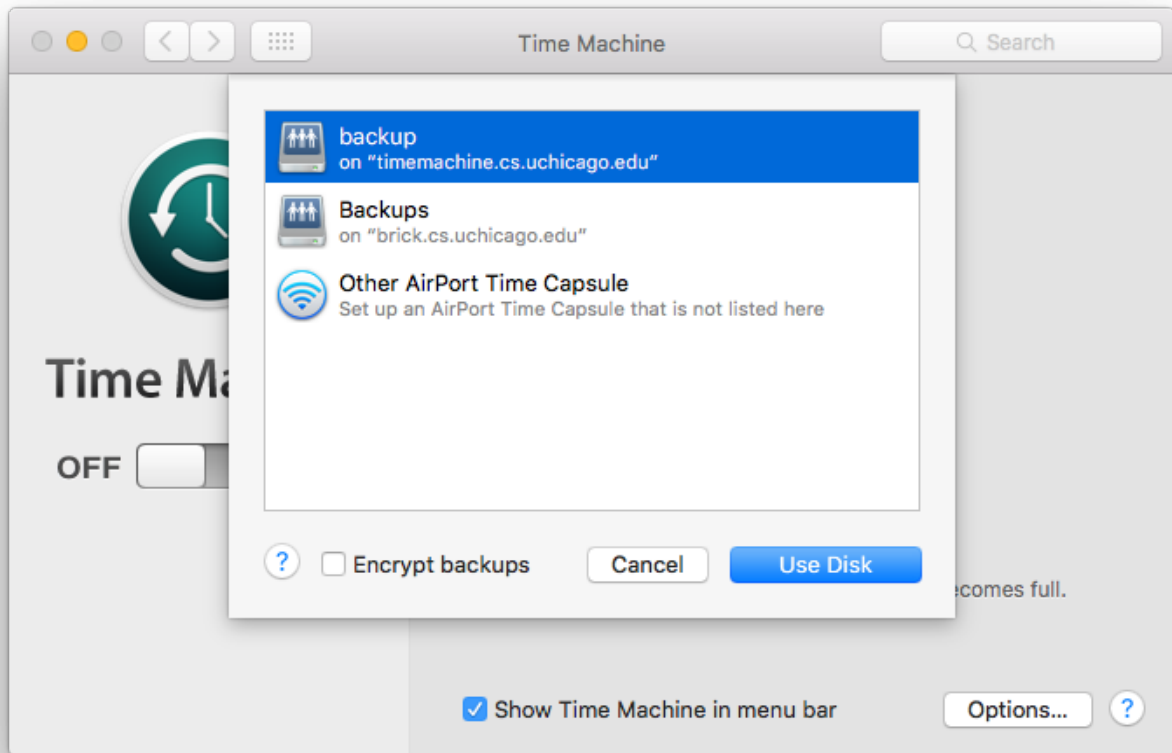

### Step 5

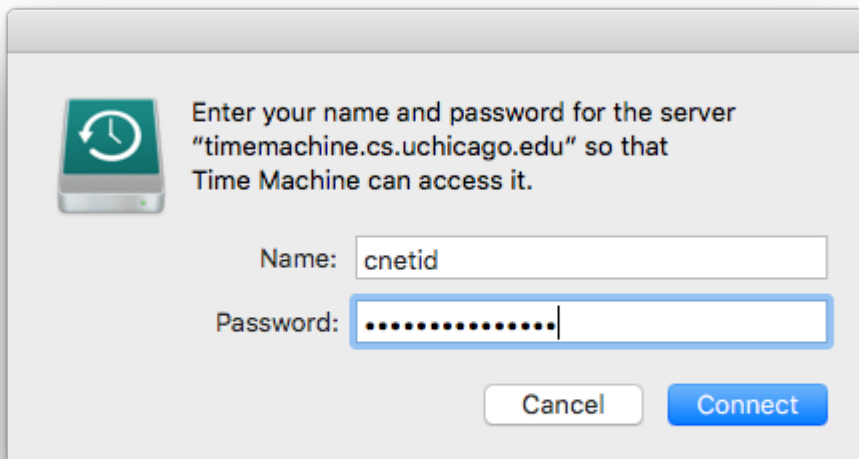

Now that the volume is mounted we can select it from with the Time machine preference window.

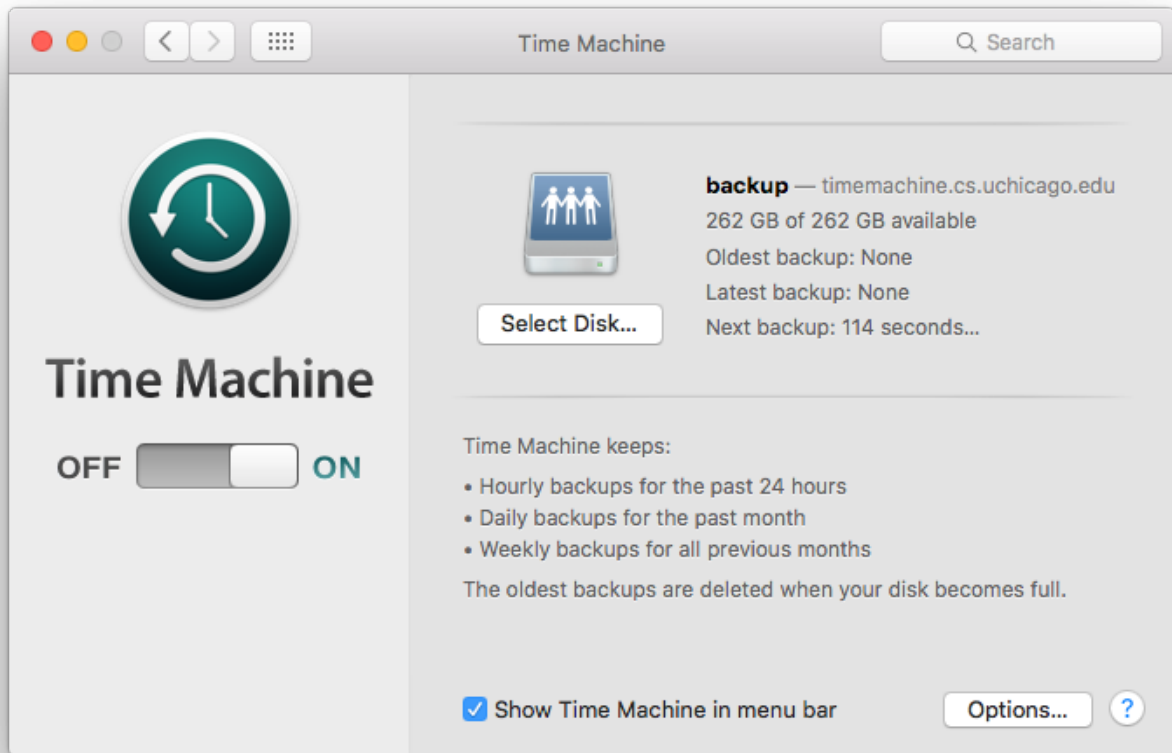

## Step 6

### Step 7

### Step 8
