

# NoMachine Client Connection Guide

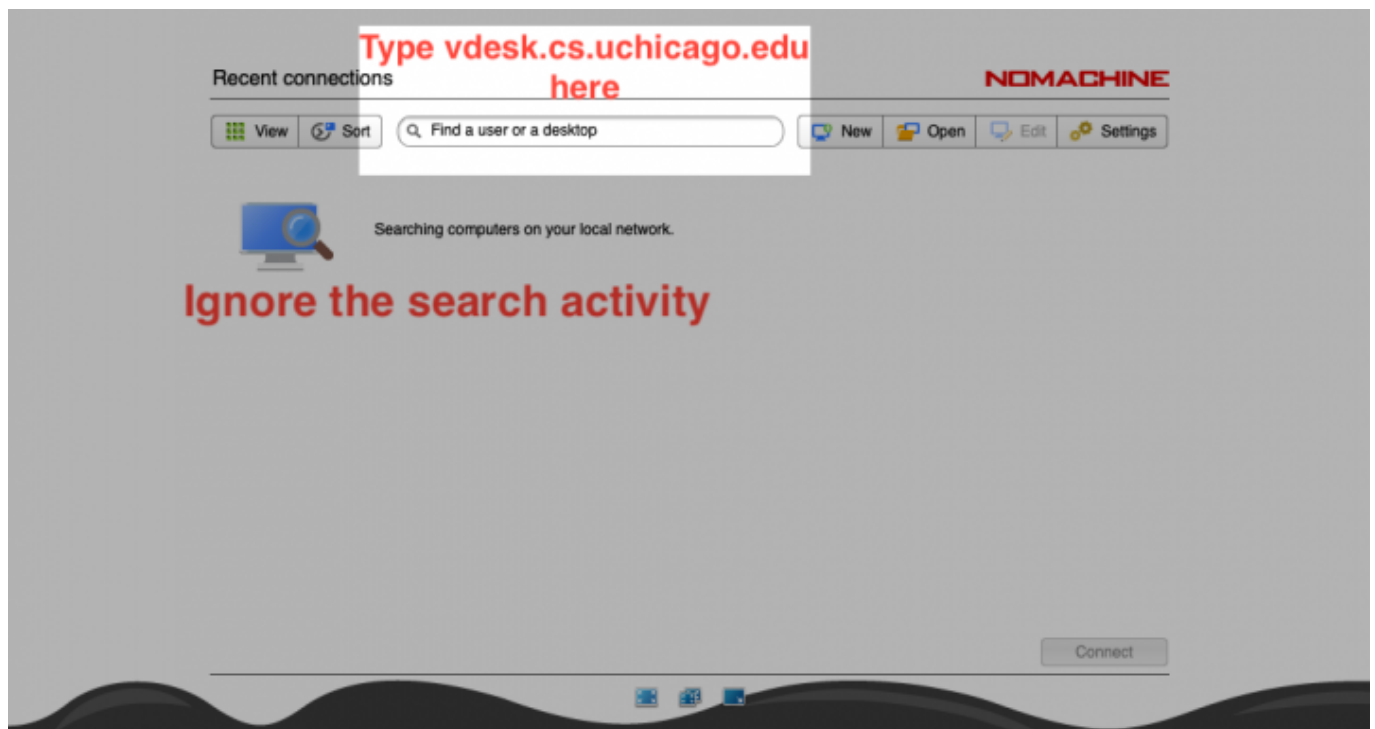

## Download and Install

If you haven't already, [Download and Install](#) the enterprise client. Follow the procedure that applies to your computer.

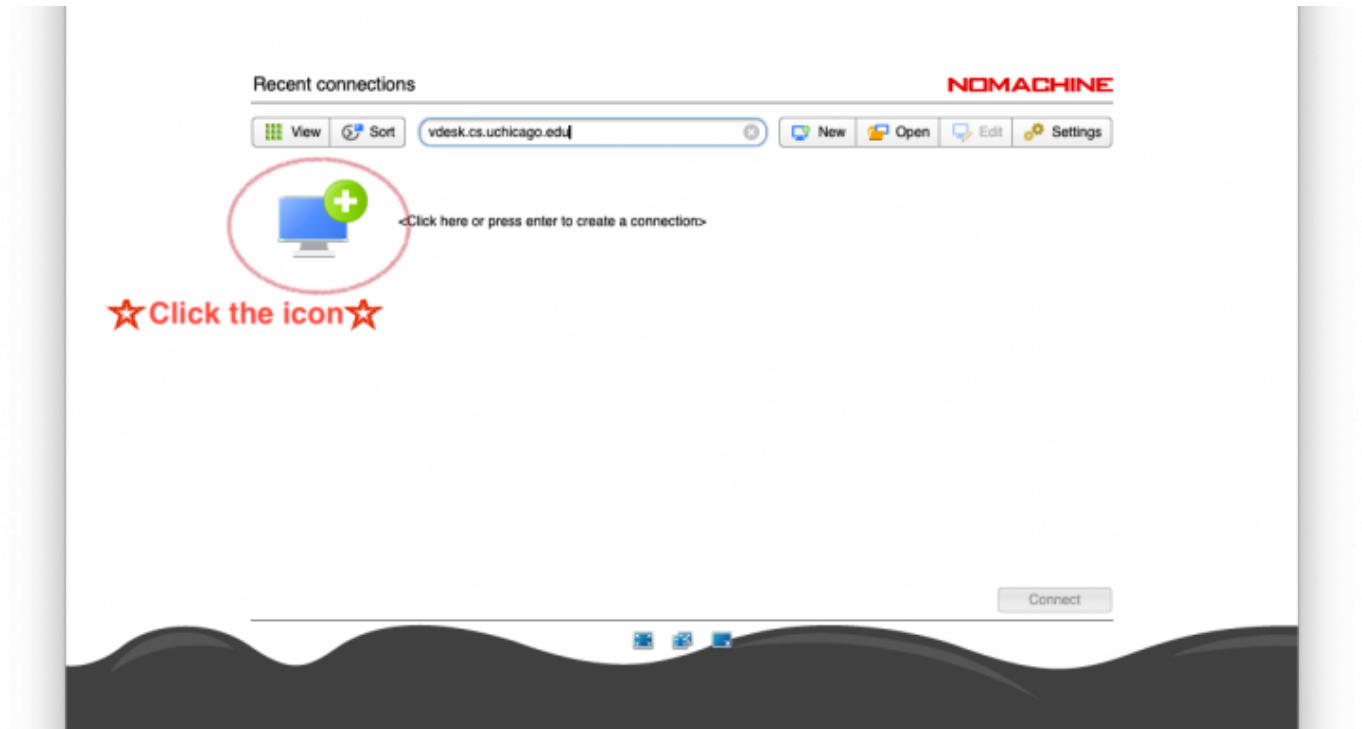

Note: The application is preferred over [the browser](#). Try it out or, [read about the differences](#).

## Launch and Configure the Client

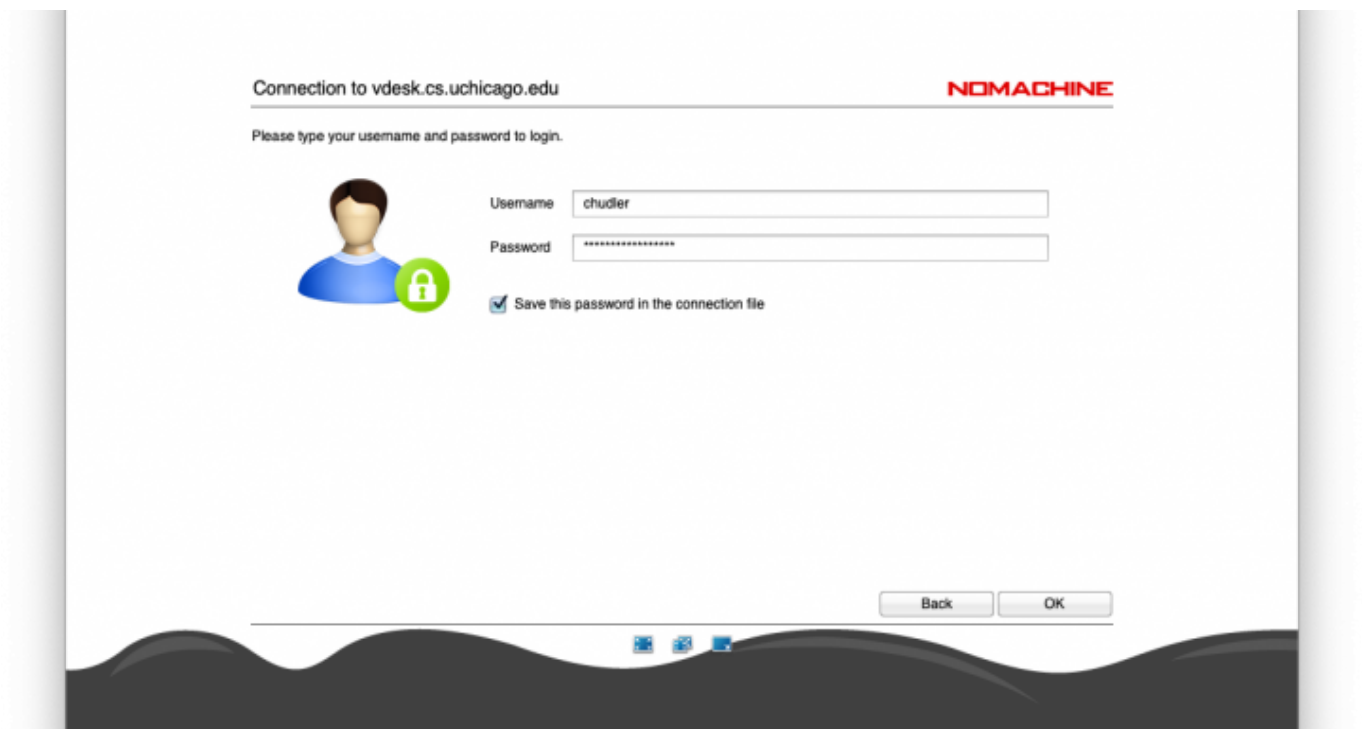

NOTE: The application will try to autodiscover hosts, and this is not a valid option. Ignore the application's attempts to discover hosts and proceed with these instructions.

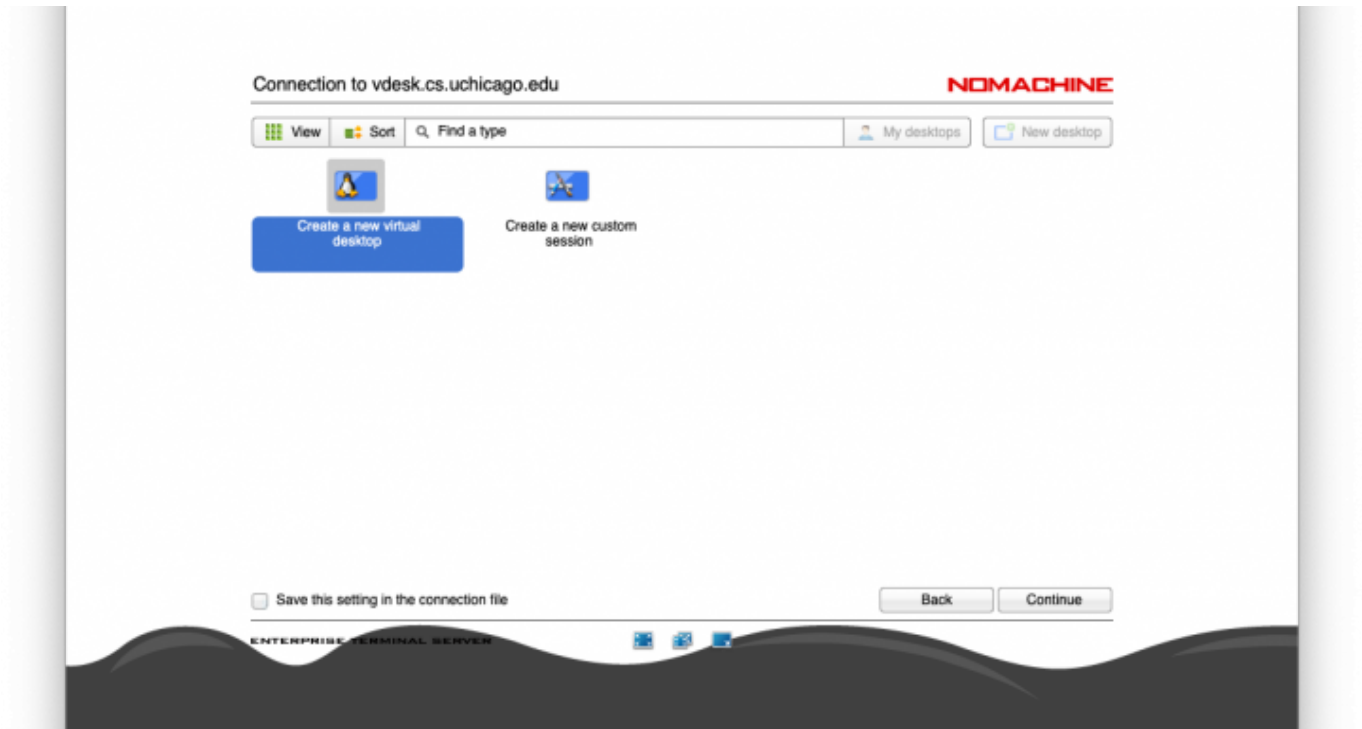

## Start The Connection

## Login to the Remote Computer

## Choose Session

After clicking **Continue**, your remote desktop session will begin with a series of informative help and configuration options. Read these options and continue to the desktop.
