

# Remote Desktop Linux

Techstaff has a new **Virtual Desktop** service called *vDesk* <sup>1)</sup>. vDesk is currently designed to assist with CS remote study, and especially visitors to CSIL. With vDesk, you can work with a remote Linux GUI through either your browser or a [downloadable application](#) ([recommended](#)).

Note: There are currently NO GPU systems available on the vDesk infrastructure. <sup>2)</sup>

## Application Download (optional)

Download and install [NoMachine Enterprise Client](#). Then read our [Client Connection Guide](#).

The application is a better option than the browser client.

## Web Browser

The browser works well, but you might want to read about [browser caveats and frustrations](#).

To get started using the browser, click and bookmark [vDesk Login Link](#). <sup>3)</sup>

<sup>1)</sup>

report problems to [techstaff@cs.uchicago.edu](mailto:techstaff@cs.uchicago.edu)

<sup>2)</sup>

Not to be confused with [Virtual Help Desk Service](#)

<sup>3)</sup>

Need a CS Account? [Request CS Account](#)
